

# Hvordan DAMA Norge kan bidra med kompetanse på Informasjonsforvaltning

Data Management Association (DAMA) Norway

## DAMA NORWAY'S VISION

DND-DAMA Norway's vision is to standardize and formalize data management in Norway in order to increase competency and knowledge within data management.

DND-DAMA Norway will facilitate and encourage the sharing of data management experience, and wish to have a positive social impact upon society.

## WHAT'S IN IT FOR YOU?

- Increase your network with fellow data management professionals
- Increase your competency in both the width and depth of the T
- Get objective proof of your competency (get certified)
- Share experiences and learn from others in a neutral arena
- Get inspiration and passion for your subject matter!

## DAMA NORWAY IS...

- Part of Den Norske Dataforening (DND)
- Affiliated to Data Management Association (DAMA) International
- Not-for-profit
- Vendor neutral
- Run by volunteers with a passion for the topic matter

# DAMA NORWAY'S GOALS

---

Increase  
competency and  
knowledge

Standardize and  
formalize

Facilitate for and  
encourage sharing  
of experience

Stay relevant

Positive effect of  
society

Utilize and  
support network

The Norwegian Computer Association  
is Norway's biggest network for IT

We have over 7000 members from  
1300 organizations divided between  
60 different communities and boards

Together we are developing the digital  
future

# DMBOK v2 contents

The Data Management Body of Knowledge (DMBOK) v2 is the 2017 edition that provides a handy guide for data management topics

DMBOK is the Data Management Association (DAMA)'s framework on Data management, and it is adopted by data management professionals globally. The DMBOK book club can be used as a means of preparation for the Certified Data Management Professional (CDMP) certification. The DMBOK contains the following chapters:

## Knowledge areas

## Knowledge area chapter structure:

1. Introduction
  - i. Business Drivers
  - ii. Goals and Principles
  - iii. Essential Concepts
2. Activities
3. Tools
4. Techniques
5. Implementation Guidelines
6. Relation to Data Governance
7. Metrics

## Additional chapters:

- Big Data and Data Science
- Data Management Maturity Assessment
- Data Management Organisation and Role Expectations
- Data Management and Organisational Change Management

This framework can be used in conjunction with other frameworks (e.g. TOGAF) and adapted to the right context

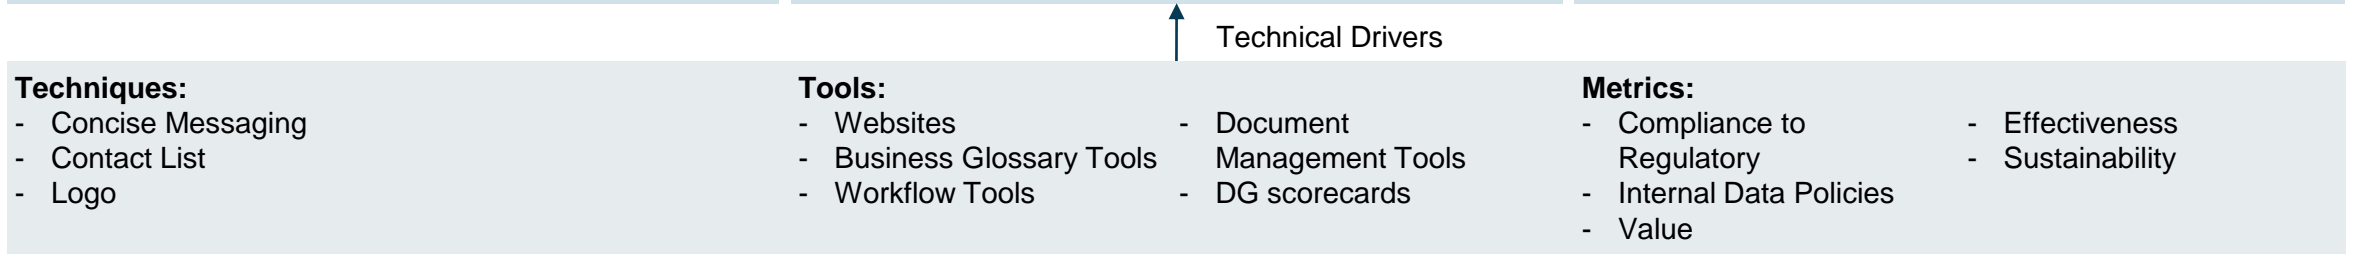

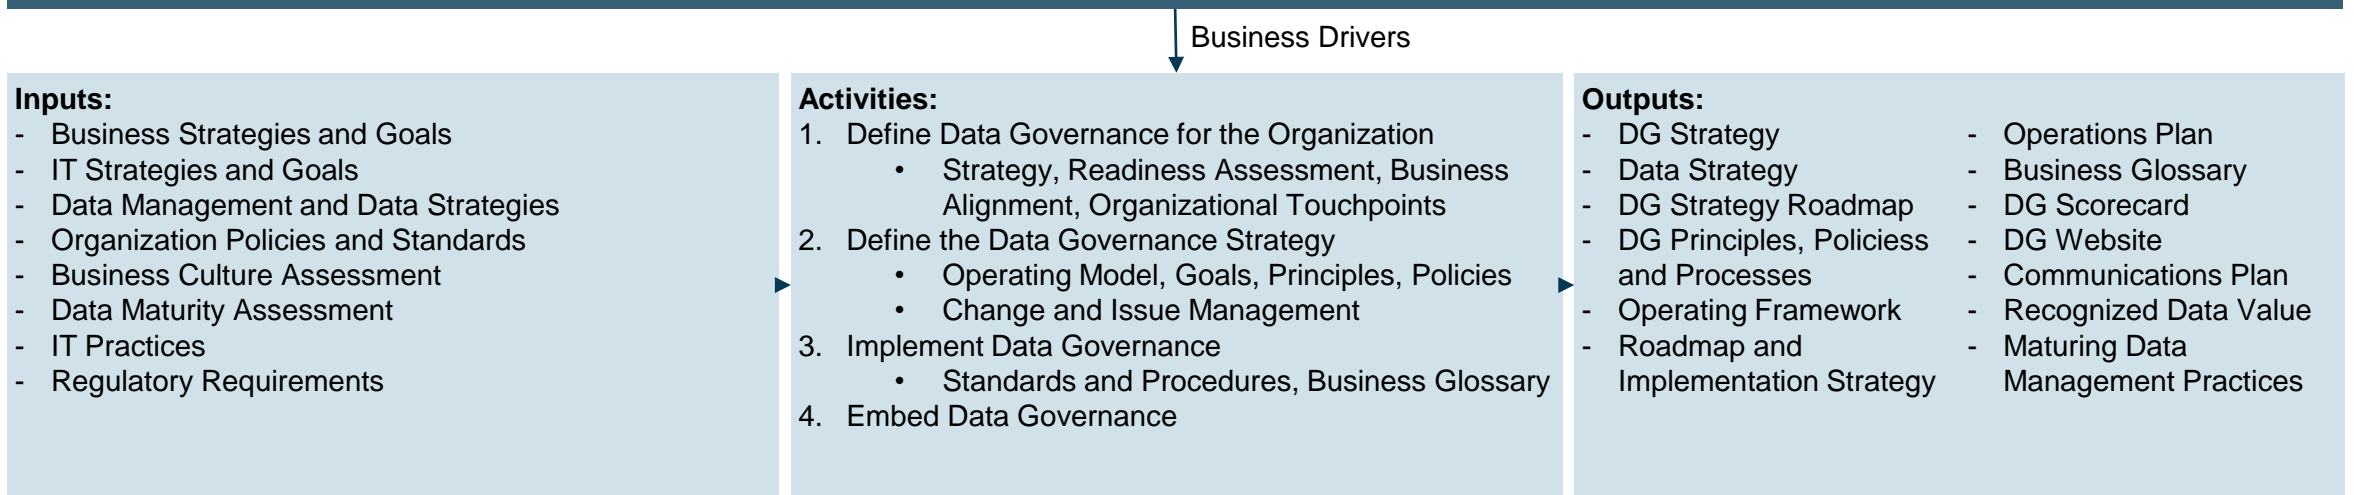

DAMA Norway currently contributes to the DMBOK v2.X revision and v3.0 edition

# DMBOK Ch. 3 Data Governance: Overview

**Definition:** The exercise of authority, control, and shared decision-making (planning, monitoring, and enforcement) over the management of data assets  
 [Principles: Leadership and Strategy, Business-Driven, Shared Responsibility, Multi-layered, Framework-Based, Principle-Based]

**Goals:**

1. Enable an organisation to manage its data as an asset
2. Define, approve, communicate, and implement principles, policies, procedures, metrics, tools, and responsibilities for data management
3. Monitor and guide policy compliance, data usage, and management activities

# DMBOK Ch. 3 Data Governance: Key takeaways

## Focus areas:

- Strategy, policy and standards
- Oversight and compliance
- Issue management
- Data asset valuation

## Key points:

- The DG function guides all other DM functions
- Oversight vs Execution – the difference between Data Governance (DG) and Data Management (DM) (see figure 15)
- DG must be sustainable, embedded and measured. It is not a one-off project
- It needs to be embedded in other areas e.g. software development, risk management, MDM, use of data for analytics
- Effective and long-lasting data governance programs require a cultural shift in organizational thinking – Focus on managing change and communication
- DG is not an end goal in itself. It needs to align directly with business strategy.
- DG is separate to IT Governance, and business-driven
- Governance itself is a common concept. Rather than creating new approaches, apply concepts and principles from other types of governance

# DMBOK Ch. 3 Data Governance: Questions and clarifications

1. Are there any questions about the chapter?
  - What does this term mean?
  - How would this work in practice?
  - Does anyone have examples to help understanding for a particular topic?
2. Discussion topics
  - What were the key takeaways from other members of the group?
  - Are there any areas that were missed?
  - How have people seen this implemented in organizations?
  - What have been the challenges?

DND strategi:  
Implementering

## Data ethics: The importance of roles

By [Johann Johannson](#) and [Maria Camilla Nørgaard](#)

Credits: DNB/Stig Fiksdal

This is the second of three articles in a series DAMA is running on data ethics, during Q1 2021. The themes of which are derived from DAMA's chapter on data handling ethics in [DMBoK2](#). [Article number one](#) discussed how a minimum level of data governance maturity is needed before an organisation can work with data ethics in any
