Why establishing a Oxalis Community ?

—

.

Why establishing a Oxalis Community ?

- Oxalis is a sample software implementation, not a commercial product
- Oxalis is only one of many Access Point solutions.
- There is a need for an easy and direct way to connect to the Oxalis implementers
- Level of involvement from Digdir is about to change
- The community needs to take ownership of trouble shooting, support and future development.

Oxalis Community – kick-off May 6

- Invitations has gone out through the Peppol network
- A consolidated list of active implementer is under construction
- Around half of the known Oxalis implementers has signed up for participation
- Purpose of the meeting is to
 - Formally establish and activate the community
 - Discuss the future of the Oxalis sample software going forward
